Career Objective

Aspiring Artificial Intelligence and Data Science graduate with strong hands-on expertise in Python, Java, SQL, and Full Stack development. Seeking to leverage analytical problem-solving skills, machine learning expertise, and robust software engineering practices to contribute to enterprise solutions at TCS.

Education

Prathyusha Engineering College — Thiruvallur, Tamil Nadu
B.Tech in Artificial Intelligence & Data Science — 2022 – 2026 | CGPA: **77% (7.7 / 10)**

Sri Ayyan Vidyashram Higher Secondary School — RK Pet, Tiruttani, Tamil Nadu
Higher Secondary Certificate (HSC) – Bio-Maths — 2021 – 2022 | Percentage: **71.5%**

Sri Ayyan Vidyashram Higher Secondary School — RK Pet, Tiruttani, Tamil Nadu
Secondary School Leaving Certificate (SSLC) — 2019 – 2020 | Percentage: **71%**

Technical Skills

Programming Languages: Java, Python, SQL, HTML5, CSS3, JavaScript
Backend & Full Stack: Core Java, Servlets, JSP, JDBC, MVC Architecture, REST APIs, Spring Boot (Basics)
Libraries & Tools: NumPy, Pandas, Matplotlib, Scikit-learn, Power BI, Git, GitHub
Databases: MySQL, Relational Database Management Systems (RDBMS)
Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms, SDLC

Projects

Online Food Ordering System | *Java, Servlets, JSP, JDBC, MySQL, MVC*
- Developed a full-stack web application adhering to standard MVC architecture for efficient request handling.
- Designed a relational database schema for menu rendering, live order tracking, and session-based cart management.
- Implemented secure user authentication, role-based access, and reliable database operations using JDBC.

AI in Educational Policy Making | *Python, Machine Learning, Scikit-Learn, Pandas*
- Engineered a machine learning framework to evaluate academic metrics and assist educational policy decisions.
- Executed data preprocessing, feature engineering, and exploratory data analysis across large academic datasets.
- Trained supervised classification models and built interactive dashboards to communicate predictive insights.

Stroke Prediction System using Machine Learning | *Python, Scikit-learn, Healthcare Analytics*
- Built a predictive healthcare model assessing stroke risk based on physiological indicators and patient histories.
- Handled dataset imbalances using SMOTE and applied normalization techniques for enhanced classifier reliability.
- Evaluated model performance across Precision, Recall, and ROC-AUC metrics to ensure accurate classification.

Internships

AI Developer Intern | *Industrial Design and Animation (IDA)* — June 2025 – July 2025
- Assisted in end-to-end Python ML workflows including dataset preparation, model benchmarking, and validation.
- Generated automated reports and visual dashboards to track predictive modeling accuracy and performance metrics.

Machine Learning Intern | *Virtual Tech Services* — July 2024 – August 2024
- Authored clean, modular Python scripts for data cleaning, statistical evaluation, and feature extraction.
- Supported model verification and deployment pipelines ensuring reliable end-to-end delivery.

Certifications

- **Python Programming** – GUVI | **Python for Data Science** – NPTEL
- **Data Everywhere** – Coursera | **Power BI Virtual Experience** – Forage
